

## *A Web-enabled system for fast, secure self-administered assessments*

ASI-MV<sup>®</sup> Connect lets you:

### Streamline assessments

The **self-administered ASI-MV Connect interview** is a consistent, standardized, research-tested tool that:

- ▶ **Saves** your agency the time and expense of staff ASI administration
- ▶ **Engages** clients and facilitates more self-disclosure and accurate data
- ▶ **Enables** you to increase the number of assessments and reduce client waiting times

ASI-MV Connect helps you serve more clients – it's available in both **English** and **Spanish**, and the new **CHAT™** (Comprehensive Health Assessment for Teens) is designed specifically for use with adolescents (ages 13-18).

### Expedite treatment planning

ASI-MV Connect's **clinical reports** are immediately available and designed to assist you in making the right treatment decisions for your clients. They include:

**Narrative Report** – Translates the raw data from ASI-MV interviews into a customizable narrative report with severity ratings, composite scores, psychiatric risk factors and other detailed information

**Client Placement Worksheet** – Populates the six ASAM dimensions with relevant data from across all of the ASI-MV domains, to assist clinicians in making level of care placement decisions

**Treatment Planning Tool** – Presents information from across all ASI-MV domains, clustered in a clinically useful manner, to facilitate treatment plan development

### Simplify data gathering

The **ASI-MV Connect Data Center** gives you a tool for taking assessment to the next level and increasing the quality of care in your program. The system automatically uploads HIPAA-compliant ASI-MV client data, de-identified and in aggregate form, to the Data Center for your review. You can use it to:

- ▶ **Monitor** progress and outcomes by viewing changes in the composite scores of the population you serve – in real-time
- ▶ **Compare** data across sites within an organization, as well as with national data
- ▶ **Gather** accurate information about your population for strategic planning, program development and grant submissions

## What people are saying about ASI-MV® Connect:

### Saves time

"Our clients no longer have to put their names on a waiting list to be assessed; a room with multiple computer stations supports the increased number of incoming clients."

*– Wes Stewart, MSW, CCJP, Director, Region 1 Treatment Accountability for Safer Communities (TASC), Coastal Horizons Center, Inc., Wilmington, NC*

### Saves money

"We're saving \$45 per assessment – the equivalent of about \$225,000 over the course of a fiscal year – by using ASI-MV Connect."

*– Sue Winter, Deputy Director of Programming, Northern Michigan Substance Abuse Services, Gaylord, MI*

### Puts client data to work for you

"This information [in the ASI-MV Connect Data Center] is invaluable for grant writing, strategic planning and program development that addresses the most pressing needs within individual communities. I've successfully used the Data Center in grant resubmissions to more accurately describe the problems of the populations we serve. It also helps providers, and the entire state, track how well we are doing in treating substance abuse."

*– Jim Clarkson, MA, LADAC, Director of Substance Abuse Programs for ValueOptions of New Mexico, Albuquerque, NM*

---

ASI-MV Connect is used at hundreds of organizations across the U.S., Canada and Puerto Rico. To learn more about how ASI-MV Connect can help you save time and money while increasing the quality of care:
